

## DRINKING WATER PROBLEM CORRECTED

**ESTE INFORME CONTIENE INFORMACION IMPORTANTE ACERCA DE SU AGUA POTABLE. HAGA QUE ALGUIEN LO TRADUZCA PARA USTED, O HABLE CON ALGUIEN QUE LO ENTIENDA.**

As a customer of the Ridglea Water System,  
you were notified on Saturday, October 12, 2024 of a problem with our drinking water and were advised to  
boil your water before drinking as a result a loss of positive water pressure due to an electrical issue.

We are pleased to report that the problem has been corrected and that it is no longer necessary to \_\_\_\_\_  
boil your water before drinking.

We apologize for any inconvenience and thank you for your patience.

At approximately 10:45 AM on October 12, 2024, South Coventry Township was made aware of a water pressure issue affecting the Ridglea Water System. Technicians were immediately dispatched and diagnosed the issue as an electrical malfunction that disrupted service to the well pumps, resulting in a loss of positive water pressure.

In response, water sampling was conducted in accordance with Pennsylvania Department of Environmental Protection (PA DEP) requirements. These tests for chlorine residual and bacteria met all state and federal drinking water standards.

As a result, the Boil Water Advisory has been lifted, and it is now safe to resume normal use of the water system.

South Coventry Township sincerely appreciates your patience and understanding during this time.

As always, you may contact:
